

New Improved Indoor Cricket Balls

After several years development work in consultation with Cricket Australia, Burley is relaunching a new and improved indoor cricket ball!

Manufactured from a new fluoro leather, the resulting ball exhibits significantly enhanced visibility for players and spectators alike. Importantly, our ball retains its signature high visibility for longer than any other balls, which can quickly become dirty and difficult to see.

The fluoro ball has been developed over a number of years with a thorough testing program. This program, in conjunction with market forces, have dictated a reduction in the range to just two balls; **Supersoft** and **Low Impact**.

CBSSICF - Super Soft

The ball officially endorsed by the 'World Indoor Cricket Federation' for use in all International Matches as well as all National League Matches in Australia.

(Green/Red Stitch)

CBLOICF - Low Impact

The Low Impact ball is also used worldwide and features excellent shape retention characteristics. The Low Impact ball has a slightly harder center than the Super Soft.
